BLOOMING MASTERPIECES

A fantastic horticultural stage
October 26 to November 10

A horticultural concept on show throughout the town during the Chrysanthema festival. First of all, ideas will be collected on how the annually changing motto can be creatively expressed in beds and borders. This will be followed by plan drawings, which represent the basis for flower arrangement and the work of the horticulturists. Allow yourself to be transported into an imaginary world full of colour and interesting shapes.

THEMED FLOWER BEDS

MUSEUMSPLATZ SQUARE

Three figures from the "Picture of the Great Gate of Kiev" painting by Wassily Kandinsky grace Museumsplatz as three-dimensional chrysanthemum sculptures. The expressionist painter, graphic artist and art theoretician, Wassily Kandinsky (1866-1944), was a war pioneer in the field of abstract art. His works combine painting, architecture and music.

HISTORIC TOWN WALL

The more than fifty green tones in the painting entitled "The Dream" by Henry Rousseau (1844-1910) inspired this dream for framing chrysanthemums and other greenery. The self-taught French painter is assigned to the naive art genre. He is considered one of the pioneers of surrealism. Through various levels, the painting conveys a theatre backdrop with spatial depth. It shows a perspective in which painting and living nature come together.

STADTMÜHLE

An original Carreta stands here as a tribute to our twin city, Alajuela. These Costa Rican ox carts represent a cultural asset that is greatly respected in their homeland and are part of the UNESCO World Heritage. The carts were once used for transporting coffee from the highland down to the coast. The painting, which has been created with vibrant colours and includes geometric figures, offers an indication of the cart's national heritage. The complex patterns are repeated in the chrysanthemum bed.

LAMMSTRASSE

The extensive colours and organically abstract forms that Henry Matisse uses in his "La Gerbe" lithography almost allow a floral counterpart made of chrysanthemums to be animated from this. A challenge for horticultural ambition and a fascinating experience in the perception of a blossoming masterpiece.

URTEILSPLATZ SQUARE

The Japanese Garden in Urteilsplatz square is dedicated to the Asian roots of the chrysanthemum. An ozukuri is an attractive eye-catcher and particularly complex masterpiece that is produced from a single shoot the size of a thumb. With almost 300 palm-sized flowers, it is truly unique in Europe. Cultivating such a unique creation takes one and half years, as well as a great deal of horticultural expertise.

"Torii" are **unmistakably Japanese**. These gates, which are closely linked to "Shinto" (the way of the kami), generally designate the transition from our human world to the holy world of the monasteries. One of the best known torii paths is located at the Fushimi Inari Shrine in Kyoto. For the 25th anniversary of the Chrysanthema event, you can also immerse yourself in this stunning landscape with a Far Eastern feel when walking through the 25 red torii in Lahr.

SONNENPLATZ SQUARE

The Europa-Park is staging Sonnenplatz square in an incomparable way with a dedicated flower bed in keeping with the motto "Blooming masterpieces!"

SCHLOSSERSTRASSE

The trainees from Bau- und Gartenbetrieb Lahr present their skills with their own themed flowerbed. Bunting with colourful lanterns lends the street a degree of Japanese flair.

ROSENBRUNNEN

When it comes to the descendants of the Chrysanthemum indicum – the basic form of the chrysanthemums used today, there is an almost infinite diversity of varieties. Several of the more unusual and rare varieties can be admired in a special display at the Rosenbrunnen. The shape, colour and texture of the individual varieties highlight the diversity of these natural flowering masterpieces!

SCHLOSSPLATZ SQUARE

As usual, Schlossplatz square is to be decorated by our French friends and neighbours. The Eurodistrict flower bed is a floral arrangement in keeping with the motto of "Blooming masterpieces". Our twin town of Dole is also offering up a surprise with a cleverly designed flower bed in keeping with the Chrysanthema event. Dole is located in the heart of Franche-Comté and attracts visitors with its picturesque old town and excellent food. Erstein and Benfeld are just a few kilometres on the other side of the Rhine. The sugar festival in Erstein is a popular destination for a day trip.

STORK TOWER

Set against the backdrop of the remains of the Tiefburg castle that was constructed in the 13th century, the Gutenberg Bible, which is considered one of the most important early printed works, offered inspiration for the design the chrysanthemum bed. Rows of chrysanthemums with strict arrangements represent the text area. Complex, sweeping and colourful chrysanthemum plantings then pick up on the illustrations at the edge of the imaginary page.

FLOATS ADORNED WITH FLOWERS

Handcrafted and decorated with hundreds of chrysanthemums, fascinating flower floats await Chrysanthema guests again this year along the circular route and in the town hall gardens. The themes will be switched over half way through the festival. You can see the position of the floats in the plan to the right.

SPONSORING

The **Chrysanthema Lahr** festival has very close links to the town of Lahr and the region as a whole. This flower festival with its flower arrangements, musical events and cultural programme is only possible thanks to the active support of renowned companies and service providers, friends and sponsors. They all help to ensure that the Chrysanthema can be enjoyed in full bloom.

Brings people, Lahr and the considerable diversity of the region together.
